River Basin Management

WaSiM user conference 20 – 21 February 2014

First Announcement

In 2005 the last WaSiM user conference took place in Zurich. Within the following years WaSiM has been used by different institutions, in different scales and for different purposes. As a spin-off of various projects the model has been developed and extended with many sophisticated new tools, e.g. a water retention module, a silting-up and surface routing module, a permafrost module and a module for heat transport in soils.

These new developments of WaSiM give us an excellent opportunity to collect the different WaSiM experiences and to discuss the latest applications of WaSiM.

Therefore the conference will offer the WaSiM community a possibility to discuss the Pros and Cons of WaSiM, to provide bugfixes and to manage its further development. Additionally, it offers a platform for hydrologists for practicing, dialogue, discussion and getting-together.

Overview

The WaSiM user conference will take place at Technische Universität München from 20th to 21st February 2014. You will get detailed information about venue, program, evening event and accommodation within the next few weeks.

Course content and structure

Thursday afternoon (20.02.) and Friday morning (21.02.) the participants will get the opportunity to inform themselves about different WaSiM applications in oral presentations. A poster session for presenting further projects and studies concerning WaSiM is intended, too. On Friday afternoon it is possible to attend one of the two offered WaSiM training lectures (basic and advanced).

Participation

The conference is open to WaSiM users of universities, research institutions, consulting engineers and the water administration. Beginners as well as professionals are welcome to this event.

Organizers

- Chair for Hydrology and River Basin Management, Technische Universität München, Prof. M. Disse
- Hydrology Software Consulting, Dr. J. Schulla

October 7th 2013

Technische Universität München

Faculty of Civil, Geo and
Environmental Engineering

River Basin Management

Costs

100 €, including
evening event, coffee breaks and conference documents

Registration

To register for the conference, please send an email to
wolfgang.rieger@tum.de until November 30th, 2013
(please use the registration form below)

Abstracts

Abstracts should be submitted to wolfgang.rieger@tum.de before
November 30th, 2013. We will inform you about the acceptance of your
contribution (oral presentation/poster) until end of December.

Participation Registration Form for WaSiM user conference 2014

Family Name (Prof./Dr./Mr./Ms)	
First and Middle Name	
Affiliation	
Mailing Address (Office or Home)	
Telephone Number (Office or Home)	
Fax Number (If available, office or home)	
E-mail Address	
WaSiM training type (basic, advanced, no training)	
Accommodation needed? (yes/no)	

Please send this registration form to

E-mail: wolfgang.rieger@tum.de

FAX: +49-89-289-23221

Submission deadline is **November 30th, 2013**
