

Digitalisation does not stop at Christmas ...

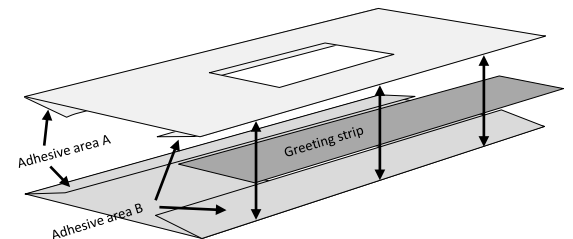

With best wishes for a Merry Christmas 2022 and a Happy New Year 2023. Whether digital or analogue, who knows what else will come.

Your Lehrstuhl für Statik.

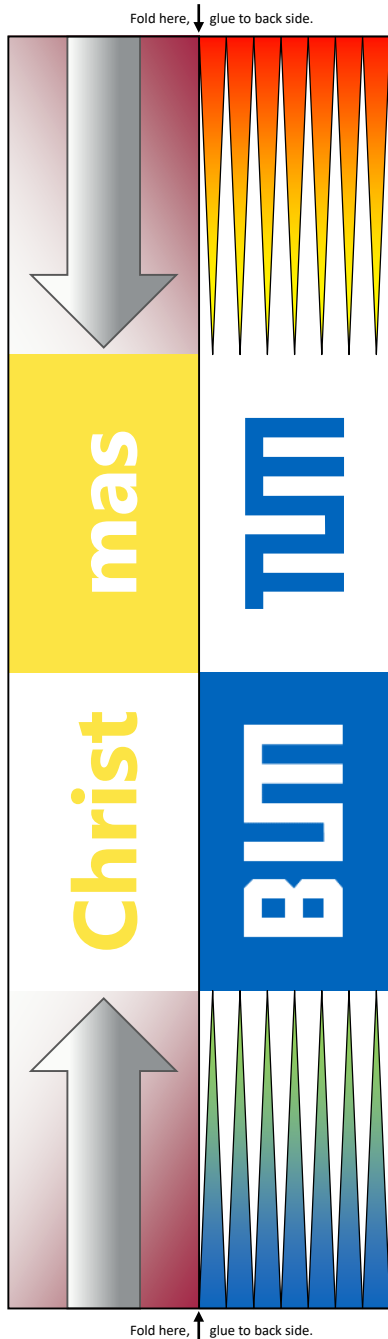

Have fun making your own unique digital Christmas card!

And this is how it works:

1. Cut out and fold the diaphragms and greeting strips. Glue the greeting strip to its back.
2. Glue Adhesive areas A and B to the back of the diaphragms.
3. Glue both diaphragms together at the adhesive areas. Be careful not to glue the glide bed of the greeting strip.
4. Thread in the greeting strip. Slide back and forth: (0)-(1).

Hint: Score the folded edges before cutting. All solid lines are fold edges.
