

how to assemble

You need:
scissors, glue and
a rubber band.

Ideally suited is
the classic UHU
all-purpose
adhesive.

Hint: Scrape the folded edges before cutting. All visible
edges are folded edges. Pierce all holes before cutting.

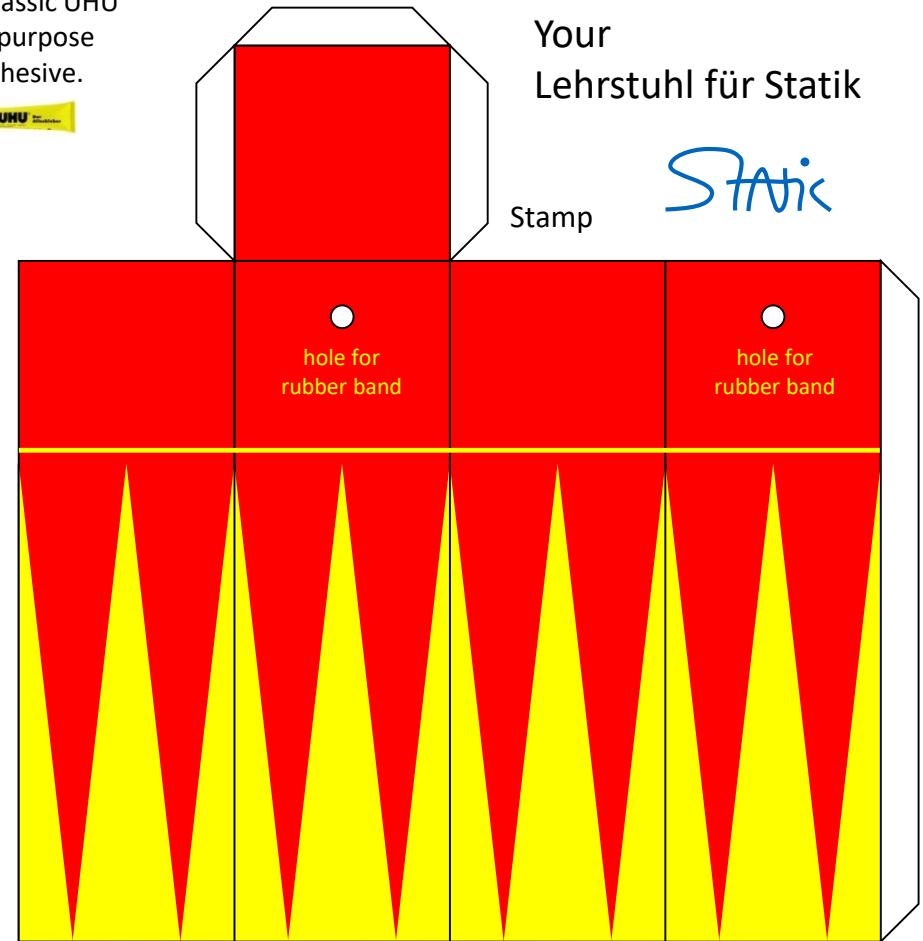

At the end of a dark year, let it rip with
the Statik Confetti Cannon and the
unique Statik Confetti Collection

We wish you Merry Christmas and a
really good and happy New Year.
